

Declaration of Taisei Corporation on Biodiversity Preservation

Based on the Taisei Group Ideal “To create a vibrant environment for all members of society,” and in order to remain an organization that learns from and cares for nature, Taisei Corporation proclaims the following action policy.

1. Analyze the risks the Company’s construction activities pose to biological resources and the ecosystem, utilize environmental management systems, and minimize the impact of those risks to the maximum extent possible.
2. Develop environmental technologies to preserve and re-create biodiversity, and utilize those technologies with clients to sustain ecological services.
3. Perform urban development and facilities design that coexists in harmony with nature, and aggressively submit proposals that serve to preserve and increase biodiversity.
4. Cooperate with business associates, including specialty sub-contractors, in pursuing biodiversity preservation.
5. Promote communication with local communities, cooperate with domestic/overseas NPO/NGO’s, engage in proactive biodiversity conservation activities, and disclose the accomplishments of those activities.
