

# Environmental Policy

Under the group philosophy of “Creating a Vibrant Environment for All Members of Society”, Taisei Corporation, through its construction activities, strives for development of high-quality social infrastructure and improvement of the living environment in harmony with nature.

Moreover, realizing a sustainable society is a challenge common to all humankind, and a mission to be accomplished as a company.

With these environmental management principles as a guide, Taisei Corporation and its group companies actively strive for “environmentally friendly society”.

## 1. Development in Technology

We will develop environmental technologies, propose to customers consideration for global environment and reduction of environmental impact through all construction lifecycle stage, and together with customers, create safe, comfortable and attractive spaces with exceptional value.

## 2. Collaboration with Supply Chain

We will collaborate with our supply chain at each stage of the planning, procurement and construction activities to reduce environmental impact and to develop sustainable social infrastructure.

## 3. Cooperation with Stakeholders

We will promote communication with local communities, governments, domestic or foreign NGOs/NPOs, and other organizations, to disclose information and to resolve environmental issues actively.

We recognize “Risks and Opportunities” appropriately and utilize Environmental Management System (EMS) based on ISO14001 practically, to fulfill all above.
