

# Safety and Health Policy

In our company, TAISEI Corporation, including all group companies – having “**Safety First**” as our guiding principle and with our comprehensively and systematically implemented **Occupational Health and Safety Management System** (TAISEI OHSMS) as the basis for our administration of safety and health – we work to maintain and improve on an environment for safety and health on which our employees and workers can rely. We aim to be a company that society can perceive with empathy and trust.

## 1 The Goal of Zero Fatalities

“The Goal of Zero Fatalities” is an important issue for a corporation seeking to fulfill its social responsibilities. Working toward “The Goal of Zero Fatalities”, all relevant individuals will fully embrace this goal with the consciousness of being a responsible party.

## 2 The Prevention of Injury to Third Parties

Injuries to the public must be avoided at all costs.

In particular, in the case of construction in urban areas, a “**Plan that Prioritizes Preventing Injury to Third Parties**” should be established and thoroughly carried out.

## 3 Improving the Standards of Safety and Health

We appropriately conduct a work cycle of “**Plan–Do–Check–Act**” (PDCA) that is based on our “Occupational Health and Safety Management System (TAISEI OHSMS)”. Along with carrying out a program of **Risk Assessment and the adoptions of necessary measures based on that assessment**, we reduce the risks in our workplace, we endeavor to educate site staff and workers about safety and health, and we continuously take steps to improve the standards of safety and health.

Following these policies, employees of TAISEI and Subcontractors should earnestly focus their attention on their management skills and safety, and they should aim, of course, for “The Goal of Zero Fatalities”, but also take steps to “**Eradicate Accidents and Injuries**”.
