| **Low Carbon Society**   | At construction stage  
                          Reduction of CO₂ emissions per construction cost (intensity) | **−26%**  
                                                                                                   (compared to FY1990) |
|                          | At construction stage  
                          Reduction of total CO₂ emissions | **−51%**  
                                                                                                   (compared to FY1990) |
|                          | At building operation stage  
                          Reduction of design-build estimated CO₂ emissions (including dissemination and promotion of ZEB) | **−39%**  
                                                                                                   (compared to FY1990) |
|                          | Reduction of energy consumption per office floor area (intensity) | **−19%**  
                                                                                                   (compared to FY2010) |
| **Recycling Oriented Society** | Adoption of green (environmentally conscious) procurement items at building design stage | 10 items per project  
                                                                                               or more |
|                          | Reduction of final disposal rate of construction waste | **3.4%**  
                                                                                               or less |
| **Nature Co-existing Society** | Implementation of biodiversity conscious proposal | 30 projects  
                                                                                               or more |
|                          | Implementation of biodiversity conscious construction | 10 projects  
                                                                                               or more |
| **Safety Secured Society** | Proper management of construction waste, etc. and compliance with environmental-related laws and regulations | Zero environmental accidents |

Promotion of initiatives to reduce environmental impact  
“TAISEI Sustainable Action”  
At all construction sites

April 1, 2019
